Corporate Training

In our pursuit to meet the needs of corporate clients, ICD offers a gamut of fully customizable training programs. Our training programs encompass a broad range of skills that are essential and necessary for every business to perform at its optimum level.

You should choose ICD to conduct your training because

1. Our client list is a testament to our work
2. Our facilitators have extensive training experience in the ICT field. This equips them to convert concepts into relevant and applicable learning in the workplace
3. Our training programs are based on the Adult Learning Principles
4. Our exposure to the most recent developments in the ICT industry is applied in our training programs
5. Every program is customized based on the client, client's industry, and client's stated objectives

Our Corporate Training Programs include but are not limited to:

- Database Development and Management
- Website Development and Management
- Software Development and Management
- Basic Computer Training
- Accounting Software Management
- Presentation Skills

Professional Development for Educators
